

**Coding options! \$20 each code OR \$60 for unlimited!**

1303 Anderson Rd. Clawson MI, 48017 586-792-MINI (6464)

**What is Coding?** It's changing your MINI's programming to be more user friendly. The factory leaves settings in your car unprogrammed because they just never got around offering it to the public! We can offer options like rolling your windows up with your key fob, turning off your door chime when the key is in the ignition, or even being able to use your fog lights with your high beams! **And for some of those with pre-11 models a possible fix for your torque steer!** Let us know we can make your MINI better! **\*\* We work hard to give the best service and outcome, but it's possible to have some options have the possibility of still not working correctly.**

Your name: \_\_\_\_\_ Car: \_\_\_\_\_

## **Gen1 Options**

### **R50, R52, R53 (2002-2006)**

- One touch unlocks all doors
- Euro blink (2 blinks)
- Activating factory options

### **Extra "Face Lift" Options for R50, R53 MINI Cooper 2005-2006 & R52 2005-2008**

- One-touch up widow **only** on the driver's door
- Windows & convertible top god up when holding key button down

**Note:** Some early ECU programs do not have the options if the car was never updated.
